***Election/Restriction***

1. Claims 1 – 5 stand allowable. The restriction requirement between the multi-layered structure and the perpendicular magnetic recording medium, as set forth in the Office action mailed on October 31, 2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 12 – 15, 17 and 24, directed to a perpendicular magnetic recording medium are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Reasons for Allowance***

2. The present claims are deemed allowable over the reference App. 10/764,602 since the above reference is commonly assigned and a terminal disclaimer has been filed to obviate the obviousness-type double patenting rejection.

Art Unit: 1773

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious a multiple layer structure comprising a first *fcc* material, a second *fcc* material and a third *hcp* material meeting the claimed structural and composition limitations.

While the prior art of record disclose multiple crystal layers deposited on each other, the prior art of record fails to teach or render obvious the specifics of both the crystal structures *and* composition choices for the various layers.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Examiner's Comments***

5. In order to better clarify the record, the examiner wishes to point out Uwazumi et al. (U.S. Patent No. 7,067,206 B2), which disclose a multiple layer structure comprising a first *bcc* or amorphous material layer (*Figure 2, element 2 and relevant disclosure thereto*), a second *fcc* material layer (*element 3*) and a third *hcp* material layer (*element 4*). However, Uwazumi et al., either alone or in combination with the art of record, fails to teach or render obvious a structure comprising two *fcc* layers under the *hcp* layer, wherein all three layers further meet the claimed composition limitations.

**Conclusion**
